Paiute Class Teaches Students Life Lessons

Paiute language students at Reed High School are putting final touches on a very unique project. It's called Kanee - a type of shelter Native Americans used to live in.
ktvn.com|By Landon Miller

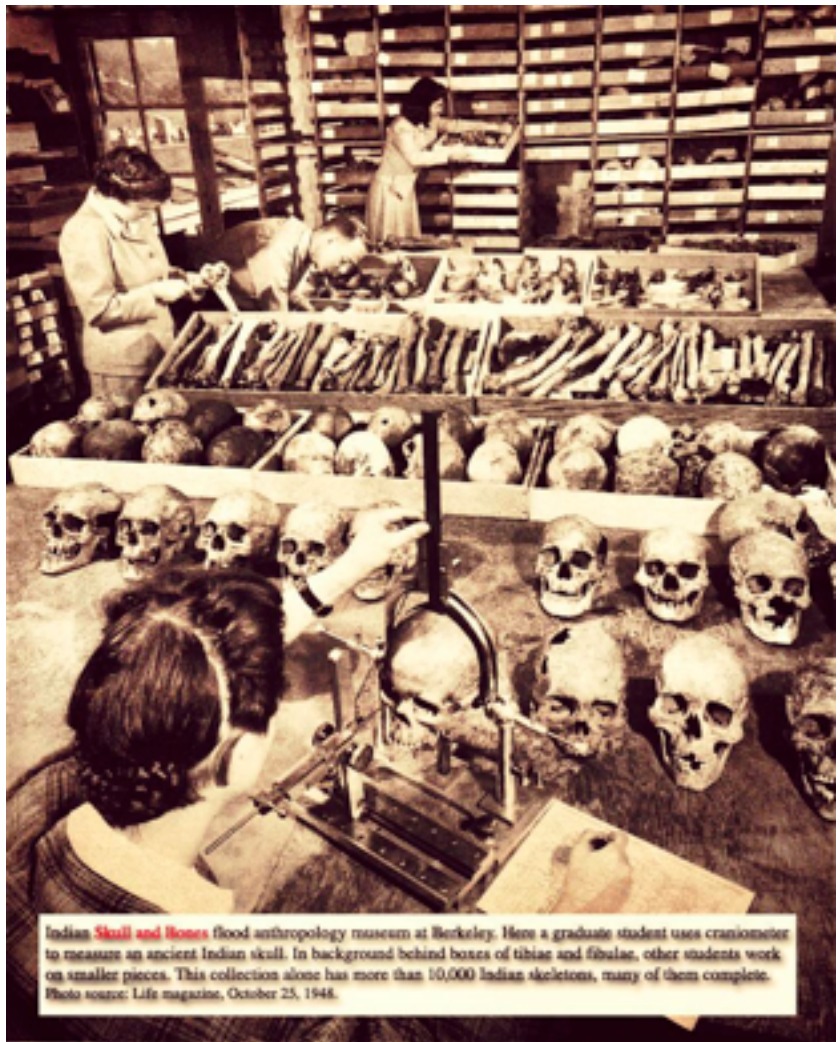

[Myron Dewey](#) added 22 new photos — at [UC Berkeley](#).

Today stopped at Berkeley University to edit ATNI documentary, do some research on Paiute/ Shoshone info, legal briefs, language and read some old native Nevadian Magazines plus visit the Graduate Center, met with some awesome women recruiters there.

True story, the first person I asked for directions to the Native Graduate center was a Hoopa tribal member, we talked, laughed and the Hoopa tribal I knew was her relative. To me it was validation I was supposed to be here today.

*Indigenous Parents

I had the most interesting field tour with Evelyn, Elder from the Western Shoshoni Nation a couple of days ago. Toured the Temoke family homestead, very beautiful up against the Ruby Mountains, saw Medicine Rock (gave thanks and asked for blessings for my Family, Mother Earth, Water and the Clean Air we breathe). She told about the original signing of the Western Shoshoni Treaty of 1863 in Ruby Valley! Learned about Medicine Springs(hot Springs) where the Shoshoni used as a Medicinal area. Completed our tour at a Family friend of her Family, he shared the stories told to him by Shoshoni Leaders and Elders that are gone now. So grateful that Evelyn took her time to share this story for the GBIA program:) (Great Basin Indian Archives

For the science wonks:

ENSO + Climate Change = Headache: The ENSO blog writes: “One of the best things about this blog is the number of excellent comments we get on each post. And after spending some time reading your comments for inspiration, I’ve come to several conclusions. One: people really care about the forecast for this winter and two: people are curious about climate change’s impact on ENSO. While I cannot tell you about snow this winter (full disclosure: I love snow and hope for a lot... everywhere. Always.), I can discuss the impact this grand experiment we have started with our atmosphere—climate change—could have on ENSO. In short, if you are someone who wants more or stronger ENSO events in the future, I have great news for you—research supports that. If you are someone who wants fewer or weaker ENSO events in the future, don’t worry—research supports that too. ...” Continue reading at the ENSO blog here: [ENSO + Climate Change = Headache](#)

Learning a Shoshone song called ' lots of pinenuts' while mom beads her new designer handbag . Priceless moments.

Electricity pylons, or transmission towers, usually aren't the most interesting structures, just basic towers that keep electrical wires aloft. But some architects have designed innovative towers that are more than mere eyesores.

Violence and Sexual Assault Coalitions Program

Open Grants are available for the development and operation of tribal domestic violence and
sexual assault coalitions in Indian country. This program assists nonprofit organizations and
individuals or groups of individuals to build Indian women's leadership and capacity in tribal
communities to advocate for systemic change that will enhance the safety of women in an
Indian Tribe. Tribal Coalition nonprofit organizations have accomplished this through technical

assistance, expanding the capacity of the tribal coalitions, developing or enhancing appropriate standards for tribal governments, tribal nonprofits organizations, tribal organizations, victim services and victim service providers to increase the understanding of sexual assault, domestic violence, dating violence, and stalking. For more info., visit <http://www.ovw.usdoj.gov/open-solicitations.htm>

Today marks the 7th anniversary of the adoption of the **United Nations Declaration on the Rights of Indigenous Peoples.**

Governments in Canada must act now to uphold the rights of Indigenous peoples, with urgency and good faith. As the Supreme Court emphasized in the Tsilhqot'in decision, "What is at stake is nothing less than justice... and... reconciliation."

[Civil rights heroes offer climate marchers a little wisdom](#)

Dorie and Joyce Ladner helped organize some of the biggest protests of the civil rights era. Here's what they have to say to activists today.

BY BRENTIN MOCK

This week we're featuring the work of artists working with [justseeds](#) who are producing beautiful posters for the march.

Today's piece is by Favianna Rodriguez.

"I developed this piece to represent an empowered woman of color in a conversation where we are largely invisible. I believe that most visual imagery about climate change does a poor job of speaking to communities of color, communities who are the most affected by environmental destruction and ecological disruption. This piece shows a fierce female standing up for our mother, Pachamama, and defending her family and her home." — with [Favianna Rodriguez](#).

With **National Preparedness Month** coming to a close next week, we wanted to thank everyone who has participated so far. If you've missed any of our webinars, you can view them anytime for free by visiting our [recorded webinars webpage](#).

We also invite you to our final and favorite National Preparedness Month webinar, **["If You Do Nothing Else This Year", next Wednesday @ 2PM ET](#)**. This session will include discussion on:

- Easy ways to build your resilience
- Preparing with minimal time and resources
- Simple steps any organization can take to start building their plan today
Learn more about the webinar and register by [clicking here](#).

Indian Land Tenure Foundation Grants

Open Tribal, local and state governments, and 501c3 nonprofit organizations, including educational institutions are eligible. The Foundation is devoted to serving Indian nations and Indian people in the recovery and control of their rightful homelands. Programs and initiatives are focused on education, cultural awareness, economic opportunity and legal reform. For more info., visit <http://www.iltf.org/grants> Tribal Domestic

[Arizona State Museum web page](#)

The Arizona State Museum is the oldest and largest anthropology museum in the Southwest, established in 1893. Its collections are world renowned in the study and research of the indigenous peoples and lands of the American Southwest and northern Mexico. Its research library holds over 50,000 specialized titles in these subject areas, while its archives houses the papers and field notes of such Southwestern anthropologist legends as Emil Haury, Grenville Goodwin, Edward and Rosamond Spicer, and Clara Lee Tanner.

Collections:

- [Early Southwest Archaeology at Point of Pines Pueblo \(AZ\)](#)
- [Forman Hanna: Selected Photographs from the Arizona State Museum Collection](#)
- [Gila Pueblo Archaeological Foundation Medallion Papers](#)
- [Helga Teiwes Photographs of Tohono O'odham Indians 1970-1980](#)
- [Images of Tohono O'odham Polychrome Pottery Making Study](#)
- [Select Photos from Arizona Native Basketry Traditions](#)
